Profile

Ph.D. student in Economics at Sungkyunkwan University. My current research agenda focuses on housing and commercial real-estate markets, using big data, econometrics, and machine learning for property valuation and local market analysis. This work builds on my earlier research in empirical asset pricing, portfolio choice, and financial machine learning.

Education

Sungkyunkwan University Ph.D. in Economics	2026–present
Sungkyunkwan University M.A. in Economics	2026
Inha University B.S. in Industrial Engineering	2024

Research Interests

Commercial Real Estate · Housing Markets · Asset Pricing · Portfolio Choice · Big Data & Machine Learning

Awards & Fellowships

Korean Finance Association – Kiwoom Securities Ph.D. Fellowship Recipient, 2026–2027
Best Paper Award, Korean Financial Management Association 2025
BK21 Fellowship, Sungkyunkwan University, Master’s Program 2024–2025
BK21 Fellowship, Sungkyunkwan University, Ph.D. Program Recipient, 2026–2027

Conference Presentations

- Korea’s Allied Economic Associations Annual Meeting, Financial Engineering Session February 2026
- Korean Financial Management Association Annual Conference November 2025
- Asia-Pacific Association of Finance International Conference July 2025
- SERI International Conference July 2025
- Seoul Workshop on Empirical Finance May 2025
- Korean Financial Management Association Annual Conference November 2024
- SERI International Conference July 2024
- Korea’s Allied Economic Associations Annual Meeting February 2024

Skills

Econometrics: Panel data, hedonic pricing

Machine Learning (including DL): Tabular prediction with panel structures, interpretability (SHAP, PFI, PDP), image-based analysis, text mining, ensemble methods

Programming: R (fixest, tidyverse), Python (scikit-learn, PyTorch), DuckDB, SQL

Tools: L^AT_EX, Git

Languages

Korean (native) · English (proficient)

Military Service

Republic of Korea Army, CBRN Specialist 2019–2021
